

Class 6 Science · Ch 2 Worksheet B · Animals and Adaptations

Total marks: **13** · Questions: **8**

Instructions: Practise classifying animals and identifying their adaptations.

Q1. Animals that eat both plants and other animals are called [1 mark]

- (A) Herbivores
- (B) Carnivores
- (C) Omnivores
- (D) Decomposers

Q2. Fish breathe with [1 mark]

- (A) Lungs
- (B) Gills
- (C) Skin only
- (D) Trachea

Q3. Which adaptation BEST helps a polar bear survive in the Arctic? [1 mark]

- (A) Thick white fur
- (B) Webbed feet
- (C) Long legs
- (D) Bright colours

Q4. An animal that lives both on land and in water is called an _____. [1 mark]

Q5. A whale is a fish because it lives in water. [1 mark]

- (A) True
- (B) False

Q6. Mention any two adaptations a camel has for desert life. [2 marks]

Q7. Compare a fish and a frog: how are their adaptations different even though both spend time in water? [3 marks]

Q8. Design a simple key (yes/no questions) to identify these animals: cow, eagle, fish, lizard. [3 marks]

Answer Key

Class 6 Science · Ch 2 Worksheet B · Animals and Adaptations

Q1. Animals that eat both plants and other animals are called

Answer: Omnivores

Omnivores eat both plants and animals (e.g., humans, crows).

MCQ · EASY · 6-SCI-DLW-03

Q2. Fish breathe with

Answer: Gills

Gills extract dissolved oxygen from water.

MCQ · EASY · 6-SCI-DLW-03

Q3. Which adaptation BEST helps a polar bear survive in the Arctic?

Answer: Thick white fur

Thick fur insulates against cold; white colour hides the bear in snow.

MCQ · MEDIUM · 6-SCI-DLW-03

Q4. An animal that lives both on land and in water is called an _____.

Answer: amphibian

Amphibians like frogs and salamanders live both on land and in water.

FILL_BLANK · EASY · 6-SCI-DLW-03

Q5. A whale is a fish because it lives in water.

Answer: False

Whales are mammals — they breathe air through lungs and feed milk to their young.

TRUE_FALSE · MEDIUM · 6-SCI-DLW-04

Q6. Mention any two adaptations a camel has for desert life.

Answer: A hump that stores fat for energy and water; long legs that keep its body away from hot sand; ability to drink large amounts of water at once and conserve it for days. Any two are correct.

Tests knowing camel adaptations.

SHORT_ANSWER · MEDIUM · 6-SCI-DLW-03

Q7. Compare a fish and a frog: how are their adaptations different even though both spend time in water?

Answer: A fish has gills (only) and a streamlined body; it must stay in water. A frog has lungs and skin to breathe; webbed feet for swimming and jumping legs for land. The frog can leave the water; the fish cannot.

Tests comparing aquatic vs amphibian adaptations.

SHORT_ANSWER · HARD · 6-SCI-DLW-03

Q8. Design a simple key (yes/no questions) to identify these animals: cow, eagle, fish, lizard.

Answer: Sample key. Q1: Does the animal live mostly in water? Yes -> Fish. No -> Q2. Q2: Does it have feathers? Yes -> Eagle. No -> Q3. Q3: Does it have hair/fur and feed milk to young? Yes -> Cow. No -> Lizard. (Other valid yes/no chains also accepted.)

Tests creating a dichotomous key.

LONG_ANSWER · HARD · 6-SCI-DLW-04
