Answer Key

Class 6 Science · Ch 3 Worksheet C · Deficiency Diseases

Q1. Scurvy is caused by deficiency of

Answer: vitamin C

Vitamin C deficiency causes scurvy.

MCQ · EASY · 6-SCI-MEH-04

Q2. Anaemia is caused by deficiency of

Answer: iron

Iron deficiency reduces haemoglobin in blood.

MCQ · EASY · 6-SCI-MEH-04

Q3. _____ deficiency in children causes weak, soft bones — a disease called rickets.

Answer: Vitamin D

Vitamin D + calcium are needed for healthy bones.

FILL_BLANK · EASY · 6-SCI-MEH-04

Q4. _____ deficiency causes goitre, a swelling of the thyroid gland in the neck.

Answer: Iodine

Iodised salt prevents goitre.

FILL_BLANK · EASY · 6-SCI-MEH-04

Q5. Eating spinach with a slice of lemon is good for an anaemic child.

Answer: True

Spinach has iron; vitamin C in lemon helps absorb it.

TRUE_FALSE · MEDIUM · 6-SCI-MEH-03

Q6. A child has bleeding gums and feels tired. Which deficiency might she have, and what foods would you suggest?

Answer: This sounds like vitamin C deficiency (scurvy). Suggest foods like orange, lemon, amla, guava, tomato — all rich in vitamin C.

Tests linking symptom to deficiency to food.

SHORT_ANSWER · MEDIUM · 6-SCI-MEH-04

Q7. A village has many cases of goitre. Suggest one practical change the community can make and explain why it helps.

Answer: Use iodised salt in cooking and at the table. Iodine is added to the salt in tiny amounts. Daily use over weeks raises iodine levels and prevents goitre.

Tests applying nutrition knowledge to a community problem.

SHORT_ANSWER · HARD · 6-SCI-MEH-04

Q8. Design a small poster (in words) titled 'Food for Strong Bones'. Include three messages and three foods to recommend.

Answer: Sample. Title: Food for Strong Bones. Messages: (1) Drink milk every day for calcium. (2) Spend 20 minutes in the morning sun for vitamin D. (3) Eat green vegetables like methi or palak. Foods to recommend: Milk and curd; ragi (finger millet); leafy greens like methi/palak. Any creative, accurate poster accepted.

Open-ended creative task.
