

Class 6 Science · Ch 3 Worksheet A · Food Components

Total marks: 14 · Questions: 8

Instructions: Identify the food components and their roles.

Q1. Carbohydrates give us mainly [1 mark]

- (A) growth materials
- (B) quick energy
- (C) calcium
- (D) iron

Q2. Proteins help us mainly to [1 mark]

- (A) build and repair body parts
- (B) quench thirst
- (C) provide vitamins
- (D) run faster

Q3. _____ is the indigestible plant material that helps in passing waste smoothly. [1 mark]

Q4. _____ is a mineral required for strong bones and teeth. [1 mark]

Q5. Vitamins are needed in large amounts every day. [1 mark]

- (A) True
- (B) False

Q6. Match each food group with the role it plays: carbohydrates, proteins, fats, vitamins, fibre. [3 marks]

Q7. For each component below, name a typical Indian food source: carbohydrate, protein, fat, vitamin, mineral. [3 marks]

Q8. Plan a balanced lunch for yourself for tomorrow. List the items and tag each with the main food groups they cover. [3 marks]

Answer Key

Class 6 Science · Ch 3 Worksheet A · Food Components

Q1. Carbohydrates give us mainly

Answer: quick energy

Carbohydrates like rice and roti are quick energy sources.

MCQ · EASY · 6-SCI-MEH-01

Q2. Proteins help us mainly to

Answer: build and repair body parts

Proteins are the body's building blocks.

MCQ · EASY · 6-SCI-MEH-01

Q3. _____ is the indigestible plant material that helps in passing waste smoothly.

Answer: Roughage

Roughage (fibre) helps the digestive system.

FILL_BLANK · EASY · 6-SCI-MEH-01

Q4. _____ is a mineral required for strong bones and teeth.

Answer: Calcium

Calcium builds bones and teeth.

FILL_BLANK · EASY · 6-SCI-MEH-01

Q5. Vitamins are needed in large amounts every day.

Answer: False

Vitamins are micronutrients — needed in small amounts but vital.

TRUE_FALSE · EASY · 6-SCI-MEH-01

Q6. Match each food group with the role it plays: carbohydrates, proteins, fats, vitamins, fibre.

Answer: Carbohydrates — quick energy; Proteins — growth and repair; Fats — long-lasting energy and warmth; Vitamins — protection from disease; Fibre — smooth digestion.

Standard role mapping.

SHORT_ANSWER · MEDIUM · 6-SCI-MEH-01

Q7. For each component below, name a typical Indian food source: carbohydrate, protein, fat, vitamin, mineral.

Answer: Carbohydrate — rice, roti, potato. Protein — dal, paneer, eggs. Fat — ghee, peanut, butter. Vitamin — orange (vitamin C), spinach (vitamin A). Mineral — milk (calcium), spinach (iron).

Tests the student's ability to connect food groups to local foods.

SHORT_ANSWER · MEDIUM · 6-SCI-MEH-01

Q8. Plan a balanced lunch for yourself for tomorrow. List the items and tag each with the main food groups they cover.

Answer: Sample plan: 2 rotis (carbohydrate), 1 bowl of dal (protein), 1 vegetable like palak (vitamins, minerals, fibre), curd (protein, calcium), salad (vitamins, fibre), water. Many similar plans accepted.

Open-ended; full credit for any balanced plan.
